

satellite radio is one of the best consumer offerings to come along and when they added traffic and weather it made my subscription much more valuable to me. the traffic and weather provided by xm satellite radio is far far far more detailed and useful than traffic and weather provided by local radio stations or the t.v. for that matter! i hope you will keep in mind the wants and needs of the consumer when moving forward with your decisions. i,like many others will be watching and waiting on the decisions made on this issue!
